Office Action Summary	Application No. 10/616,420	Applicant(s) HEGLI ET AL.	
	Examiner DOUGLAS B. BLAIR	Art Unit 2442	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 2/12/2010 has been entered.

Response to Amendment

Claims 1 and 19 are amended. Claims 1-8, 19, and 20 are pending.

Response to Arguments

Applicant's arguments filed 2/12/2010 have been fully considered but they are not persuasive. In Freund, the applicant recognizes that the determination is made by the client. Figure 3A shows the client being part of a LAN and the sites that the client is trying to access outside the LAN. Clearly Freund still satisfies the newly claimed limitation. As to the arguments about Freund teaching away from the claimed invention, the Examiner does not see how "determining within the LAN" in any way limits the claims to a "centralized" implementation as implied by the applicant.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Art Unit: 2442

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-8 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claims 1-8 are rejected under 35 U.S.C. 101 as not falling within one of the four statutory categories of invention. While the claims recite a series of steps or acts to be performed, a statutory “process” under 35 U.S.C. 101 must (1) be tied to particular machine, or (2) transform underlying subject matter (such as an article or material) to a different state or thing. See page 10 of In Re Bilski 88 USPQ2d 1385. The instant claims are neither positively tied to a particular machine that accomplishes the claimed method steps nor transform underlying subject matter, and therefore do not qualify as a statutory process. The claimed method including steps of determining, providing, incrementing, and blocking is broad enough that the claim could be completely performed mentally, verbally or without a machine nor is any transformation apparent. For example a person standing next to a user of a computer, looking over the user's shoulder, could perform these broadly claimed steps without any device being necessary.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2442

Claims 1-8 and 19-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent Number 5,987,611 to Feund et al. in view of U.S. Patent number 5,801,747 to Bedard and in further view of U.S. Patent Number 6,486,892 to Stern.

The claims are rejected for the reasons given in the response to arguments section and the sections indicated in the rejection made in the last office action.
